

The Online Credit Card Payment Service

The Online Credit Card Payment Service

The Online Credit Card Payment Service (OCCPS) enables travel industry providers to accept credit card payments over the internet during the online booking process and during the back office reservation center booking process.

The Online Credit Card Payment Service can be provided in one of three ways:

- › An integrated feature within an Enoyaone Online Booking System
- › Connection to any booking system as an external service
- › An independent service within reservation centers

Main Features

1. The best and simplest online payment solution for the travel industry
2. Transactions are processed at real time with one of the leading international credit card companies - VISA, MasterCard, AMEX or JCB
3. Plug and play service – fast and simple implementation process with existing online booking websites
4. No complex agreements, no local bank restrictions

Implementation Options

Integrated service with the Enoyaone Online Booking System

Allowing the customer to complete all bookings and online payments within the Enoyaone Booking System

External online payment service

The OCCPS is integrated within an existing hotel or airline website enabling customers the freedom to complete payment and receive confirmation all at real-time

Back office, Front Desk and Reservation Center Online Payment Facilities Procedure:

- › Customer calls reservation centre
- › Call centre representative proceeds with the booking process
- › Email sent automatically to customer once booking procedure is complete
- › Email has a link to the OCCPS secured online payment page
- › Customer completes all payment details and submits
- › Email is sent to customer confirming booking

Anti fraud services

- › Stolen credit card black list
- › Advanced anti fraud alert system:
 - Return IP check
 - Multiple customer booking alert
 - Special tracking Cookies
